Education

Parul University

Bachelor of Technology – Computer Science Engineering CGPA: 6.43 / 10

Vadodara, India

2022 – 2026

Jaihind High School

Higher Secondary (12th) – MSBSHSE Percentage: 71.33%

Maharashtra, India

2022

Garud High School

Secondary School (10th) – MSBSHSE Percentage: 80%

Maharashtra, India

2020

Experience

J.P. Morgan Chase & Co. (via Forage)

May 2025

Software Engineering Virtual Experience

Remote

- Completed a virtual internship focused on backend and enterprise application development.
- Integrated Apache Kafka for real-time event streaming within a Java-based application.
- Developed and tested RESTful APIs using Spring Boot and implemented H2 in-memory database for persistence testing.

Deloitte (via Forage)

June 2025

Technology Virtual Experience

Remote

- Completed a technology consulting virtual experience focused on software engineering practices.
- Worked on real-world inspired tasks involving coding, technical development, and client-focused problem solving.
- Applied analytical thinking and programming skills to design scalable solutions in simulated enterprise environments.
- Gained exposure to Deloitte's digital transformation and technology consulting approach.

Projects

Multiple Disease Prediction System | Python, ML, Flask, TensorFlow

Jan 2025 – Mar 2025

- Developed a web-based AI system to predict diseases including diabetes, heart disease, and kidney disease.
- Performed data preprocessing, feature selection, and model training using Scikit-learn to enhance prediction accuracy.
- Integrated CNN-based deep learning models for image-based detection of pneumonia and malaria.
- Built a Flask web interface to collect patient inputs and display predictions in real-time.

Blood Bank Management System | Flask, Python, SQL, HTML, CSS

Jun 2024 – Jul 2024

- Designed and developed a web platform to manage blood donations, requests, and inventory efficiently.
- Implemented donor and recipient modules with search and blood request functionality.
- Developed RESTful backend services using Flask to handle authentication and workflows.
- Integrated SQL database to maintain donor records, blood stock levels, and transaction history.

CONSULTRACK – Consultancy Management Platform | MERN Stack

Aug 2024 – Sep 2024

- Built a full-stack MERN application to manage consultancy operations, clients, and service workflows.
- Designed responsive React dashboards for client onboarding and consultation tracking.
- Implemented RESTful APIs with Node.js and Express for business logic and CRUD operations.
- Used MongoDB for efficient storage and management of client and consultation data.

Technical Skills

Languages: Python, Java, C, C++, JavaScript, SQL, HTML/CSS

Web Dev Tools: React.js, Node.js, Express.js, VS Code, Android Studio, Git, GitHub, Postman, Jira

Cloud Platforms: Microsoft Azure, Google Cloud Platform

Databases: MongoDB, Firebase, NoSQL, SQL

AI & Data: Artificial Intelligence, Machine Learning, Data Analysis, Business Analysis

Core CS Concepts: Object-Oriented Programming, DBMS, Computer Networks, Operating Systems, Software Methodology

Certifications

Certifications: Infosys JavaScript, IBM Data Analytics, LetsUpgrade Python/React/Excel, Simplilearn GenAI, PowerBI, Blockchain, Cyber Security CTF.
